# NEW: DOCULUS LUMUS

Designed for speedy authenticity verification of security documents like:

- Travel documents (passports, ID cards, etc.)
- Bank Notes

You are the expert! Doculus Lumus helps you to quickly check the authenticity of travel documents, driving licences, bank notes, signatures and the like when you are on the move in a train, car, plane or even in the field. Different light modes bring the security features to light. With the RFID transponder check, you can quickly and reliably check the functionality of all passport transponders currently in use.

Technical data:

- 15x or 22x magnification
- 4x LED's for surface light with burst mode
- 4x UV LED 365 nm
- 8x LED's for rotating incident light
- ePass verification via RFID*
- 2 AAA batteries or with Li-Ion accumulator
- available in various colours: grey, blue, red, pink, orange, lime, Military sand, Military olive

Option:

- Carrying bag
- Infrared Laser (980 nm) for Anti-Stokes features

* also available without RFID reader

Designed and manufactured in close cooperation with document experts of the Austrian Ministry of Interior by charismaTec.
