

CRIME SCENE LAMP CSL-SHOE

Part no. 117360.

The new designed Projectina light source **CSL-SHOE** with **dimmer** completes the range of crime scene products.

The high intensity LED array supports the investigator in their daily work. The handheld lightweight battery powered device is specially designed for shoe print search and documentation.

The linear light output provides a sharp and high contrast shoe print on various surfaces. The standard telescope handle makes the use of the CSL SHOЕ light source very user friendly.

Technical specification basic CSL-Shoe:

- LED array with 16 high power LED (55 Watt), white, light intensity **dimnable**
- Beam shape, linear, 350 mm width
- Continuous operation: in default mode approx. 120 min., in high power mode approx. 45 min.
- Low battery indicator
- Fan, cooled
- Dimensions: 373 x 97 x 138 mm (w x d x h)
- Weight: lamp including storage battery approx. 2.3 kg

to complete with:

- Storage battery: Lithium Ion, capacity 14,4 V, 4,3 Ah
- Universal battery charger, 100-240VAC
- Carrying case

CSL-Shoe power button and dimming wheel

Telescope holder to facilitate evidence search

Accessories:

- Power supply for permanent mains supply 100-240 VAC
- Telescopic arm for ergonomic securing of evidence
- Colour filter red, green, blue and yellow for contrast enhancement

Color filters for contrast enhancement

Designed, developed and manufactured in Switzerland.
